Golding, B	A Pictorial Record of Southern Electric Units	Noodle Books	2009	978 1 906419 34 9	<p><u>So far as the SECR is concerned, included as an awful warning. This book pretends to include plans of SR EMUs converted from SER steam stock. But the author has simply presented a generic impression, not in fact correct for any units, and ignoring the fact that there were several different variants of each vehicle-type. The panelling is drawn incorrectly, looking more like LSWR than the SER "Wolverton" style. On the plus side, the commode handles look OK, and there are photographs although none of great novelty or interest.</u></p>
Brown, D	Southern Electric, Vol 1, Development of the London suburban network and its trains	Capital Transport	2009	9781854143303	<p>In contrast to Golding, this is an excellent book, comprising detailed and comprehensive text as well as photographs, and covering the SECR electrification proposals as well as SR electrification of ex-SECR lines and giving great detail of conversion of SER steam stock to EMUs</p>
